

CleanB-tracks is a unique blend of fibrous cellulose material designed as an ultra efficient, nontoxic hydrocarbon absorbent for use on all types of surfaces. The unique combination of natural materials will isolate and quickly absorb spills and help eliminate slick spots. CleanB-tracks is virtually dust free and easy to apply. It is able to neutralize dangerous or obnoxious odors, and is not harmful to the environment.

Benefits/Features

- Will not leach hydrocarbons to saturation
- Contains naturally occurring microbes
- Biodegradable
- Vapor Suppressant
- Hydrophobic
- Re useable to Saturation
- Contains natural aggregate

Because it is an all natural biomass product, it carries the Envirophillic seal issued by Cotton Incorporated.

It is also a USDA BioPreferred product.

Directions for Use

Apply CleanB-tracks liberally around and on top of the spill area, ensuring that the entire spill is covered. Sweep and move CleanB-tracks as necessary to maintain coverage and ensure adequate absorption. After the spill has been absorbed, CleanB-tracks can be swept up and discarded according to local, state or federal guidelines. Any unused product may be separated out and reused.

Not for use with acids!
