

# DP Seal

---

## **Product Description**

DP Seal is an engineered, proprietary lost circulation product composed of naturally occurring cellulosic material.

## **Typical Properties**

Composition	Cellulose Fiber
Color	Tan
Bulk Density	14 lbs/ft <sup>3</sup>

## **Application**

DP Seal is compatible with all types of oil based muds. The screen size ranges from 80 to minus 325 mesh. It performs well when added to pills or to the entire system and is compatible with other LCM additives.

## **Advantages**

Will not plug bits  
40% acid soluble  
Very clean with no dirt and minimal moisture  
Slow degradation due to lignin content

## **Recommended Treatment**

Treatments are based on the severity of the loss circulation. It can be used in concentrations of 2 lbs/bbl – 40 lbs/bbl. Pills and sweeps should use the larger concentrations while smaller concentrations are used when added to the entire mud system or in conjunction with other LCM additives

## **Packaging**

DP Seal is packaged in 25 lb (11.3 kg) multi-walled paper bags. Each pallet contains 66 bags and is shrink-wrapped.
